

DOSE RATE METER GRAETZ GammaTwin

Product features

- ☸ Small and handy, dose rate meter for the measurement of gamma radiation and X-rays for ambient dose rate equivalent $\dot{H}^*(10)$ and ambient dose equivalent $H^*(10)$ (local dose)²⁾
- ☸ Detector: energy compensated GM tube
- ☸ Large, digital indication of measured values on LC display (backlit)
- ☸ Selectable simultaneous or separate indication of dose and dose rate, additionally analog indication of dose rate (logarithmic bargraph)
- ☸ 4 preset dose and dose rate alarm thresholds; upon request GRAETZ changes the standard alarm thresholds according to customer requirements
- ☸ Switchable acoustic single-pulse indication
- ☸ Automatic and continuous storage of the dose into a non-volatile memory
- ☸ Storage of the dose and of set parameters even at battery change
- ☸ Permanent self test
- ☸ Designed for rough use, housing made of aluminium, protection class IP54 (splash proof)
- ☸ Menu-driven user navigation
- ☸ Supplied with a robust nylon bag

²⁾ Detecting the personal dose requires a measuring instrument with the measurand $H_p(10)$.
