# AREA MONITORS GRAETZ WS05C-1/WS05C-2/WS05C-3

## **Product features**

The area monitors WS05C-1, WS05C-2 and WS05C-3 are stationary room monitoring systems for the dose rate measurement of y-radiation and X-rays, preferably used for the permanent monitoring of isotope laboratories, radiotherapy rooms, storage rooms for radioactive materials, etc.

## The WS05C is available in the following versions:

- **WS05C-1:** Area monitor (1 measuring channel) with RS-232 interface for the operation with any probe of the GRAETZ programme.
- **WS05C-2:** Area monitor (2 measuring channels) with RS-232 interface for one measuring channel, for the simultaneous operation of max. two different or similar probes any of the GRAETZ programme.
- **WS05C-3:** Area monitor (3 measuring channels) with RS-232 interface for one measuring channel, for the simultaneous operation of max. three different or similar probes any of the GRAETZ programme.

Each measuring channel indicates the measured values on a digital, illuminated LC display ( $60 \times 30$  mm). For each measuring channel four individual dose rate alarm thresholds are free programmable over the whole measuring range of the connected probes.

When using  $\gamma$ -probes, the dose rate shown on the LC display is Sv/h. When an endwindow probe for  $\alpha$ -/ $\beta$ -measurements or a NaI-scintillation probe for  $\beta$ -/ $\gamma$ -measurements is connected, the measured value is displayed in cps. Additionally to the digital display, the dose rate is also indicated in analogue form by a logarithmic bar graph.

The instrument is autoranging. When a measuring channel triggers a dose rate alarm, the integrated alarm light of the WS05C gives an optical and acoustical alarm.

WS05C-3

#### In the standard version:

- Green  $\rightarrow$  "Ready for operation"
- Orange  $\rightarrow$  "Alarm threshold exceeded"
- Red  $\rightarrow$  "Error" (e.g. defective probe)

The red LED situated above the display indicates by which measuring channel the alarm has been triggered.

An RS-232 interface for one measuring channel is available for connecting the WS05C with a computer

# Options

- Relay output for an additional external alarm lamp for each measuring channel or a potential free relay output for each measuring channel instead of the relay output for the external alarm lamps (max. switching voltage/current: 24 V, 20 mA)
- Acoustic alarm disconnectible: only triggered when an alarm threshold is exceeded and the monitored room's door is open
- Emergency power supply (300 W) for the uninterruptible operation of the WS05C in case of mains failure
- **External alarm lamps** (optical/acoustical)
- Probe cable (standard length: 1.25 m), extension up to 100 m
- **Time counter**, configurable as:
  - Operating time counter: Adds the time during which the wall station/the channel is switched on.
  - Alarm time counter: Adds the time in which the wall station/the channel triggered an alarm.
  - Error time counter: Adds the time in which the wall station/the channel displayed an error.

Adds the time in which a dose rate warning threshold was triggered

Special versions upon request

## **Technical Data WS05C**

Types:	WS05C-1 for the connection of one probe (1 channel) WS05C-2 for the simultaneous connection of max. 2 probes (2 channels) WS05C-3 for the simultaneous connection of max. 3 probes (3 channels)	
Probes:	The probes are preferably connected by means of a probe cable (up to 100 m) or directly to the sockets of the WS05C.	
Measurand:	Ambient equivalent dose rate H*(10) for CE probes.	
Measuring accuracy:	≤ ± 10%	
Display:	Each measuring channel is equipped with an illuminated LC display	
Indication:	<ul> <li>Digital indication in Sv/h or cps, depending on the connected probe</li> <li>Analogue indication by a logarithmic bar graph</li> </ul>	
Alarm:	<ul> <li>Probe failure alarm</li> <li>Dose rate alarm thresholds 1 – 4</li> <li>Dose alarm thresholds 1 – 4</li> </ul>	
Alarm signals:	<ul> <li>Integrated optical/acoustical signal, triggered when a connected probe signalises a dose rate alarm (orange) and/or an error (red)</li> <li>Red LED for alarm indication when an alarm threshold is triggered (at each measuring channel)</li> </ul>	
Interface:	RS-232 for one measuring channel (WS05C-2/WS05C-3 $\rightarrow$ first measuring channel)	
Dose rate alarm		
thresholds:	4 dose rate alarm thresholds for each measuring channel, programmable within the measuring range of 0.5 $\mu$ Sv $\leq$ H*(10) $\leq$ 10 Sv	
Dose alarm		
thresholds:	4 dose alarm thresholds free for each measuring channel, programmable over the whole measuring range of the connected probe(s)	
Temperature range:	0°C up to +40°C for the area monitor -30°C up to +60°C for the probes	
Humidity:	Max. 90% relative humidity	
Power supply:	90 – 260 V AC 200 mA max. 50/60 Hz	
Housing:	Plastic, high-impact	
Dimensions:	Approx. 260 mm x 230 (455) mm x 150 mm	
Weight:	Approx. 2.8 kg	

# Available probes:

Probe type	Measuring range Type of radiation	Energy range
18545 CE	150 nSv/h ≤ Ḣ*(10) ≤ 200 µSv/h y and X-rays	40 keV – 1.3 MeV
18550 CE	10 µSv/h ≤ $\dot{H}^{*}(10)$ ≤ 20 mSv/h y and X-rays	40 keV – 1.3 MeV
18529 CE	0.5 mSv/h ≤ $\dot{H}$ *(10) ≤ 10 Sv/h y and X-rays	70 keV – 3 MeV
18509 CE	50 μSv/h ≤ Ḣ*(10) ≤ 1 Sv/h γ and X-rays	55 keV – 1.3 MeV
18526 D	Background approx. 25 cpm Approx. 4 cps at 1 $\mu$ Sv/h <sup>137</sup> Cs $\alpha$ , $\beta$ , $\gamma$ radiation	
Nal-Scintillation probe 2002	Background approx. 135 cps Approx. 1,500 cps at 1 $\mu$ Sv/h $^{137}$ Cs $\beta$ / $\gamma$ radiation	y radiation > 25 keV β radiation > 100 keV

For detailed information please see separate data sheed "GRAETZ probes".
